

Argonaut PRO

The Clevertronics range of Argonaut PRO LED Weatherproof Battens have been specially designed for use in **underground car parks, stairwells, fire stairs, corridors and back of house areas** to provide maximum energy and maintenance savings.

Reduction in
Maintenance Costs

Reduction in
Energy Costs

Features & Benefits:

Robust & Weatherproof	IK09 Impact rating and IP66 Ingress protection with UV stabilised polycarbonate diffuser
Chemical resistant	Glass Fibre Reinforced Plastic (GRP) base offering high chemical resistance
Microwave sensors	All products available with Microwave sensors with adjustable standby light to save on energy cost
Lamps	Long life LED 50,000hrs [L70, B10 Ta 40°C] Ra>80
Light output	3000lm to 6000lm options. Long life 50,000 hours
Light Distribution	Outstanding light uniformity and vertical illumination levels
Efficacy	Up to 113 lm/W at full light output
Batteries	Available in LP Premium and L10 Optimum so you can save up to 90% on battery replacement
Testing	Available with Zoneworks XT, Clevertest or DLI
Applications	Ideal for Carparks & Stairwells, corridors and back of office areas

The wide beam distribution from the Argonaut PRO range ensure that they provide excellent uniformity and illuminance levels at maximum spacing requirements. With an IP66 rating and built to an IK09 impact rating the Argonaut Pro product range is built to withstand the environments they are exposed to including areas where high chemical resistance is required.

All Argonaut PRO battens are fitted with long lifetime LEDs (50,000hrs) and are available in the LP Premium and L10 Optimum ranges which provide up to 3 times the battery service life compared to NiCd and NiMH alternatives. Battery life is extended due to Lithium battery technology and the use of an emergency pod which keeps heat away from light sources, saving money and inconvenient maintenance intervals.

Products are available in 600mm and 1200mm lengths and have a very high efficacy of up to 127lm/W at full power, delivery a superior lighting lifetime outcome through its light distribution.

TECHNICAL SPECIFICATIONS:

	ARGONAUT PRO 2FT		ARGONAUT PRO 4FT	
Construction	Glass Fibre Reinforced Plastic (GRP) base and UV Stabilised Polycarbonate diffuser			
Mounting	Ceiling / Wall Mounted			
Lamp(s)	LED Strip Module, 4,000K, 50,000h Product Life [L70, B10 Ta 40°C] Ra>80			
Operating Volt	240V AC; 50Hz			
Power Factor	0.95			
IP Rating	IP66 - Batten IP65 - POD			
Operating Temp	0°C to 40°C			
Impact Rating	IK09	IK08	IK09

CARPARK:

Considerations	Argonaut PRO Solution
Achieving the lux requirement at the desired location within the carpark	Argonaut range of products have various sizes and light output
Achieving optimal spacing of emergency luminaires based on the classification	Argonaut products are D63 & D50 Emergency classification luminaires resulting in wide spacings
Start up performance of the luminaires in cold temperatures to achieve light output required	Argonaut LED strips & arrays start up to maximum output instantaneously and are not affected by low temp conditions
Can previous holes and paint marks be covered up with new fittings if retrofitting	Argonaut wide body battens covers all previous footprints and therefore not requiring painting
Ensure uniformity of light output on the floor surface to prevent spotlight effect	Light distribution of Argonaut PRO battens are similar to fluorescent WP battens delivering excellent uniformity
Ensure vertical surfaces (post, columns) are illuminated so they can be seen properly by occupants, especially vehicles	The light distribution of the Argonaut PRO batten range delivers light on vertical surfaces which often cannot be achieved through other LED luminaires

AS/NZS1680.2: Recommendation for Circulation Space and Other General Areas.

Type of interior or activity	Maintained illuminance (lx)
Entrances / Driveways:	
(a) During daytime	
- first 15m	800
- next 4m	160
(b) During night time	160
Normal parking spaces	40

Flexibility to choose fitting configuration and options to meet requirements:

- Length
- Shape
- Lumen output
- Battery type
- Testing methods
- Occupancy sensor

STAIRWELLS:

Considerations	Argonaut PRO Solution
Ensure luminaires can achieve 80 lux average on the stairwell tread and landings	Argonaut range of products have various sizes and light output
Wall or ceiling mounted fitting requirements	Argonaut range can be wall or ceiling mounted
Can previous holes and paint marks be covered up with new fittings if retrofitting	Argonaut wide body battens covers all previous footprints and therefore not requiring painting
Lighting up of vertical surfaces (post, columns) through wide light distribution	The light distribution of the Argonaut batten range delivers light on vertical surfaces which often cannot be achieved through other LED luminaires
Height, width and length of chamber will affect the selected luminaire shape and lumen output requirements	Argonaut Range of products have various shapes, sizes and light output

AS/NZS1680.2: Recommendation for Circulation Space and Other General Areas.

Type of interior or activity	Maintained illuminance (lx)
Stairwell (internal)	80
